

March 9, 1965

Dr. Dan F. Bradley
Physical Chemistry Section
National Institute of Mental Health
Bethesda, Maryland

Dear Dr. Bradley:

I have just seen your article on "Reconstruction of Protein and Nucleic Acid Sequences. I. Systematics and Computer Program" which appeared in the October, 1964 issue of Biopolymers, and would like very much to have a reprint of it, and any subsequent reports you make on this subject. I would be interested to see any other articles related thereto that you could send, or perhaps send reference information on.

Sincerely yours,

Joshua Lederberg
Professor of Genetics

Dan F. Bradley and Carl R. Merril, Physical Chemistry Section, NIMH, and Marvin B. Shapiro, Computation Branch, Division of Research Services, National Institutes of Health, Bethesda.

Biopolymers, Vol. 2, pp 415-444 (1964)
